

STUDENT EXAM GUIDES

STUDENT EXAM GUIDE 03: PROCTORING TOOLS: INVIGILATOR APP

Version 05/05/2026

The **Invigilator App** is a smartphone-based application used to invigilate non-venue-based assessments in a more controlled and monitored environment. It assists UNISA in upholding academic integrity by providing a control mechanism for assessments written outside a venue.

The app may, at random intervals during an assessment:

- Request that you take selfies.
- Request that you take a photo of valid proof of identification, such as your ID document, driver's licence or student card.
- Request that you take a photo of your script, where applicable, with your student number clearly visible.
- Record audio while your assessment is underway.
- Upload photos, audio files and, where applicable, script images to The Invigilator database.

Note: The Invigilator App is used for invigilation purposes only. Students must still follow UNISA's official assessment instructions to access question papers and submit answer scripts on the relevant UNISA platform.

Important: You must confirm whether your module will use The Invigilator App before downloading, registering, and preparing to use it. If none of your modules is invigilated using the app, you may not be able to register or access an assessment on the app.

CHECK IF YOUR MODULE WILL REQUIRE THE INVIGILATOR APP

Students can establish whether or not their module is invigilated by the Invigilator app, by clicking on the following link:

[Check if your module uses the Invigilator app](#)

If none of a your modules are invigilated, then you will not be able to register on the Invigilator App.

BEFORE THE EXAMINATION

To ensure that you are ready to use The Invigilator App, complete the following steps well before your first invigilated examination:

- Check whether your module will use The Invigilator App.
- Download and install The Invigilator App.
- Register on the app using your UNISA details.
- Verify your account.
- Complete the app calibration process.
- Take your master selfie.
- Watch the training material.
- Complete the demo test.

It is strongly recommended that you complete these steps at least **three days before** your scheduled invigilated examination.

DOWNLOAD AND REGISTER THE INVIGILATOR APP

The Invigilator App is available from:

- Google Play Store
- Apple App Store
- Huawei App Gallery

Search for **"The Invigilator"** and download or install the app.

Tips

- Ensure your phone's operating system is updated to the latest version.
- If you cannot find the app in your app store, your phone's operating system may be outdated. Update your phone's software and search again.
- The app works on smartphone devices and is designed not to be battery- or data-intensive.

REGISTER ON THE INVIGILATOR APP

Open the app and select **SIGN UP** if you are a new user.

When registering, ensure that:

1. You use your **UNISA myLife** email address.
2. You select UNISA as the academic institution.
3. Your email address entries match exactly.
4. Your password entries match exactly. (Note that this is a new password you create and not your myUnisa password, so keep it safe for future use)
5. You are connected to the internet.

If you receive an error stating that your email has not been confirmed by your academic institution, check that your student number and email address have been entered correctly. If the error continues, contact the help desk.

VERIFY YOUR ACCOUNT

After registering, a verification code will be emailed to your **UNISA myLife email address**.

To verify your account:

1. Check your UNISA myLife email inbox.
2. Enter the verification code into the app.
3. Select **VERIFY**.

If you do not receive the email:

- Check your spam, junk or promotions folder.
- Use the **Resend** option on the confirmation screen.

CALIBRATE YOUR DEVICE

After account verification, the app will guide you through a calibration process.

During calibration, the app will:

- Check whether your device is compatible.
- Show you how to use the app during an assessment.
- Request access to your microphone, camera and GPS.
- Test your device audio.

You must allow the app access to your microphone, camera and GPS when prompted.

If you cannot hear the test sound, ensure that your phone's **media volume**, not only ringtone volume, is turned all the way up.

TAKE YOUR MASTER SELFIE

After calibration, you will be required to take a **master selfie**.

When taking your master selfie:

1. Position your face within the outline shown on the screen.
2. Ensure your face is well-lit.
3. Avoid bright or excessive light behind or beside your face.
4. Take a photo of your actual face, not an ID document, student card or other object.
5. If possible, remove glasses, masks or face coverings.

LOGIN

To log in, enter your UNISA myLife email address and the password you used during registration, then select **LOGIN**.

Ensure that:

- You are connected to the internet.
- You enter the password used to register.

You may log into the app before the exam, but the **Start Invigilation** button will only become active once the assessment officially begins.

TRAINING RESOURCES AND DEMO EXAM

Work through the training material and complete the mock exam at [CCA-020: Invigilator App | myStudentSkillsHub](#). It is crucial to register in advance and complete the demo test to ensure your mobile phone is correctly set up and that you know what to expect. We reiterate, please do so **three days** before your scheduled invigilated examination.

USING THE IN-APP BROWSER

The Invigilator App includes an in-app browser that allows access to the myUnisa myExams portal from inside the app.

This is useful when you use only one device for both the app and myExams access.

Although using one device for myExams access and another device for app access is recommended, it is possible to use a single device.

Please note:

- If you are using one device, first open The Invigilator App and then access myExams through the app.

ON THE DAY OF THE EXAMINATION

Access your question paper

1. Access the question paper on the myExams home page platform at <https://myexams.unisa.ac.za/portal/>, click on the module, log in and access the question paper by clicking on your module code.
2. Do this **15 minutes** before the start time of your assessment.

Starting the Invigilation

1. Log in to The Invigilator App.
2. Open the menu on the left-hand side.
3. Select **My Exams**.
4. Locate your **Take Home** examination.
5. Select **Start Invigilation** when the button becomes active. The button will become active **15 minutes** before the official starting time of the examination and deactivate up **30 minutes** after the official starting time of the examination.
6. Open your assessment and complete the app prompts when required.

You will only use The Invigilator App for **Take Home** examinations that require invigilation. If a module is not listed, contact UNISA for clarification.

During the Examination

Once the assessment starts:

- Keep the app open and your device close to you.
- Do **not** exit or minimise the app during your assessment, unless you need to contact The Invigilator help desk via WhatsApp.
- The app may prompt you randomly to take selfies or other photos.
- You will hear a sound and see an attention prompt when action is required.

- Do not be concerned if you do not receive prompts immediately; prompts occur randomly.
- Any completed photos will appear in the app and remain there until the end of the assessment.
- The timer in the app will continue to count down.

Note: You place your phone next to you and continue with your assessment. Your phone's screen will go to sleep, and this is expected behaviour as the app will continue running in the background.

You may access the myExams portal via the app's in-app browser by selecting the **Access Browser** button.

Finishing the Assessment

The **Finish Assessment** button will be greyed out during the first part of the assessment. Once the button turns yellow, you may stop the invigilation.

Very important: Do not stop the invigilation until you have completed your assessment. Your finish time on myExams may be compared with your finish time in The Invigilator App.

When you select **Finish Assessment**, you must confirm that you are finished by selecting **Yes, I am finished**. Any outstanding prompts must be completed before you can finish early.

Important to notes:

1. Students are requested to submit their answer scripts as prompted by the Invigilator App **AND** on myExams platform. Answer scripts solely from the Invigilator App are not accepted as formal submissions.
2. The invigilation completes as the assessment duration ends.
3. Students have **10 minutes** to scan their script in the **Invigilator app** and start the upload process after their scheduled session end time.
4. Students have **30 minutes** after their scheduled session end time of their examination to submit their answer scripts on **myExams**.

UPLOADING SCRIPT PHOTOS IN THE INVIGILATOR APP

The app will prompt you to upload photos of your script.

When prompted:

1. Select **OK**.
2. Select the **yellow plus sign** to start taking **photos** of your script.
3. Take a **clear photo** of each page of your script.
4. Ensure your student number is clearly visible where required.

You will have **10 minutes** to take photos of each page of your script. If you do not take photos of each page within 10 minutes, no script can be uploaded to the Invigilator database.

After taking photos of your script, if you fail to upload them before the timer lapses, you will still have **48 hours** to upload your saved invigilation data. **Important:** You must still submit your script within 30 minutes on the myExams portal.

SUBMITTING YOUR ANSWER SCRIPT TO UNISA

Uploading script photos to The Invigilator App does **not** replace the official submission of your answer script to UNISA.

Students must still submit their answer scripts on the official UNISA myExams platform, according to the examination instructions.

Answer scripts submitted only through The Invigilator App are **not accepted as formal submissions**.

After uploading your script photos in the app, you may choose to share or save the PDF version of your script outside the app. You may email it, WhatsApp it, save it to your phone, or use it to upload to the UNISA myExams portal.

CONFIRMING UPLOADS

After your assessment data has uploaded successfully, the app will provide a reference code.

You can confirm that your data was uploaded by:

1. Selecting the three horizontal bars in the top-left corner of the app.
2. Selecting **View Invigilated Assessments**.

It is normal for the app to show that the result is still processing for the first 24 hours.

If you are stuck on the upload screen:

- **First upload** your assessment to the UNISA myExams portal.

- Ensure you are connected to the internet.
- Exit and fully close the app.
- Log in again.
- If you are taken to the dashboard, your data was successfully uploaded.

GETTING HELP

The Invigilator app is a third-party app and not developed by Unisa. For this For technical support, contact The Invigilator support team.
